ABOUT INGENIUS

inGenius 2021 is a 24-hour hackathon organised annually by PES University, Electronic City Campus. Currently in its 10th iteration, inGenius is a one-of-a-kind hackathon that offers participants a challenging yet enjoyable environment, filled with likeminded peers. It will be conducted offline and within campus, and is hosted by the CSE department, under the guidance of Dr. Sandesh Jayanth.

With over 4000 registrations over the past nine years, inGenius is one of South India's biggest hackathons, and one of Bangalore's most famous college-level technical events.

ABOUT INGENIUS

Traditionally, a variety of companies, organizations and start-ups have sponsored the event, resulting in a wonderful collaboration that is beneficial to everyone involved. The highly competitive setting is the optimum environment for amateur developers to get noticed by sponsors and partner companies for internships and investments.

Students from any branch can participate and form interdisciplinary groups, brainstorm for ideas and be assisted by industry experts to improve their skills and work towards their goals.

THE JOURNEY SO FAR

< 2013 />

inGenius' was hosted for the first time in 2013, with around 70 participating teams.

< 2016 />

With multiple reputed companies and startups sponsoring the following iterations hereon , plenty of talented and skilled participants were offered internship opportunities.

< 2017 />

2017 was especially historical, as the total lines of code written crossed 1 million.

< 2020 />

2020 marked the first completely online iteration of ingenius - stuck in quarantine but the hackathon brought everyone together as a quaran-team

2020 : HACK FROM HOME

X

INGENIUS' FIRST EVER FULLY VIRTUAL ITERATION

SOCIAL MEDIA
_TO_THE
_RESCUE

Complying with government protocols, inGenius 2020 was conducted entirely online on the platform of Discord along with live judging on our YouTube channel and for the first time, had no entry fee or pre-selection rounds before the hack.

ENTERTAINMENT

The team conducted a multitude of activities for participants to enjoy, starting off with an Open Mic and separate channels for Among Us, Call of Duty and breakout rooms.

THE ONES THAT REALLY STOOD OUT

1

Team IRIS came up with an innovative idea to create a system to aid doctors and patients in the screening of depression using machine learning and digital signal processing.

2

Team Plicly's idea was to make a system for real time posture correction for laptops and monitors, without any wearables!

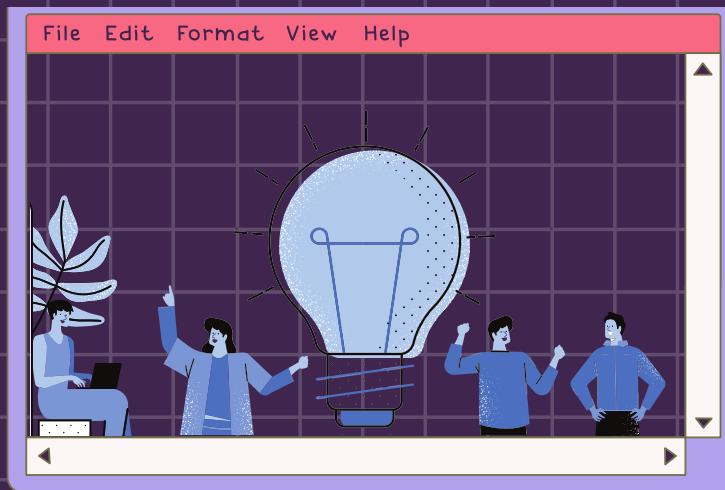

3

Team Heal_ium focused on finding a fast, easy and efficient way to predict skin cancer.

BACKSTAGE - MEET THE TEAM

The inGenius team consists of eager and energetic students from various domains who want to make a massive event of this level a resounding success. With 6 major departments- Technical, Logistics, Hospitality, Creative, Media, Marketing and Sponsorships- our team strives to ensure that both participants and sponsors get an advantageous experience. We also invite a host of dedicated mentors with diverse expertise to guide the participants through the course of the event..
